

#### Plugins Used-

- Web Sequence Diagram plugin for Eclipse.
- AspectJ plugin for Eclipse.

#### Steps to be Followed-

1. There is a file called ObserverTest.java. It is a Junit test file. Please run that file as a Junit application to get the output sequence diagram.
2. I have hardcoded the Output path of the png and wsd files in the Main.aj aspect file. Please change the path location before running ObserverTest.java
